 9.52mm to 25.52mm – Toughened/Laminate

*DécorSatin Mirror only available in 4mm annealed and vinyl back.

Excellent privacy with high light transmission

Viridian **DécorSatin™** is a high quality translucent float glass that offers high light transmission, excellent privacy and ease of handling. With its non-reflective matt satin surface, it lets in up to 87.5% of light, but diffuses it to give a natural feel. DécorSatin can be used in any number of applications including shelving, partitioning, doors, showerscreens, furniture, balustrades, privacy windows and louvres. Viridian now offers **DécorSatin™ Grey**.

Viridian **DécorSatin™ Mirror** combines the best features of DécorMirror™ and DécorSatin™, making it a high quality decorative product perfect for interior applications. The silver coating creates a unique and appealing metallic finish with a diffused light reflection, without being spectrally reflective. It is also available in vinyl back, making it a Grade A safety suitable for wardrobes, dressing rooms and shop fit-outs.

Description

DécorSatin is a float glass, where one side has been treated with an acid etch to produce a satin finish. This process is applied to the entire sheet of glass at the time of manufacture, to ensure an overall consistent finish. The finish is both moisture and UV resistant, making it ideal for exterior as well as interior applications.

DécorSatin™ Mirror has been silvered after the acid etch process to the non acid etched side.

Features and benefits

- ◆ Easy to process, DécorSatin can be toughened, laminated, or combined as part of a ThermoTech insulated glass unit
- ◆ Less susceptible to staining, with no special cleaning instructions required
- ◆ Suitable for both interior and exterior applications
- ◆ High light transmission
